Experience

ConSalt Inc.

Vancouver, BC (Remote)

FULL STACK SOFTWARE ENGINEER

September 2024 - December 2024

- Spearheading the development of an AI-powered Winter Management Marketplace using **Next.js, FastAPI, and Firebase**, with a focus on **API integrations, dynamic user interfaces, and real-time data synchronization** to deliver a **scalable solution** aligned with industry needs.
- Collaborating with **stakeholders** to continuously **refine product requirements** and establish a robust DevOps environment, automating CI/CD pipelines and **streamlining deployments**, enhancing development efficiency while playing a crucial role in securing **client partnerships**.

Norwegian Research Centre for AI Innovation (NorwAI)

Trondheim, Norway

FULL STACK SOFTWARE ENGINEER IN AI

January 2024 - April 2024

- Engineered interactive academic progression graphs within an **AI-based learning tools platform** as a member of the NorwAI team within the Norwegian University for Science and Technology, employing **D3.js, Python, Flask, and SQLAlchemy** and seamlessly integrating relational and hierarchical structures into **one dynamic visualization**, which resulted in a **75%** increase in user satisfaction as indicated by user surveys.
- Led comprehensive research on **NLP integrations** into the learning application, exploring diverse methodologies to optimize user interactions.

Cyclica Inc.

Toronto, ON

FULL STACK SOFTWARE DEVELOPER

January 2023 - April 2023

- Implemented end-to-end functionality using **Python, Django REST framework, and React.js** into a bioinformatics application based on **machine learning** to allow for molecules to be filtered by their properties, contributing to improved data analysis.
- Supported **full-stack** web application development for a **data-driven drug discovery** pipeline platform by writing **Django** queries, prototyping new functionality, conducting bug fixes, and writing unit tests.

Uptake Canada Inc.

Mississauga, ON

SOFTWARE QUALITY ASSURANCE ENGINEER

May 2022 - August 2022

- Designed 90+ automated UI and API tests utilizing **Java**, JUnit Framework, Selenium WebDriver, Jenkins, Git, Jira, and Bitbucket, substantially improving the company's operations by **streamlining the testing process** and yielding a reduction of **40 hours** annually in manual QA time.
- Enhanced customer satisfaction in software through completing **automation verification**, fixing failing automated tests, and mobile testing.

WealthMetric Analytics

Toronto, ON

DATA SCIENTIST (PART-TIME)

May 2023 - October 2023

- Engineered a cutting-edge stock trend prediction application, harmonizing **Streamlit, pandas, NumPy, YFinance, TensorFlow, and Keras**.
- Optimized portfolio strategies for clients by harnessing the **Random Forest Regressor** alongside pandas, NumPy, and Matplotlib.

Projects

GradGift - Won the 2023 Tamil Connect Hackathon

WON THE 2023 TAMIL CONNECT HACKATHON

- Created an AI-enhanced web application using **Golang, Vue.js, and Firebase** to connect university students with alumni for **funding** opportunities, featuring **OpenAI-powered chatbots** for generating user profiles and personalized interactions, which increased registration by **30%**.
- Enhanced communication with **Twilio API**, facilitating immediate SMS notifications and **doubling interactions** between students and alumni, which expedited financial support processes and significantly improved the chances of students securing needed funds.

Education

University of Waterloo

Waterloo, ON

BACHELOR OF COMPUTER SCIENCE, HONOURS, CO-OP PROGRAM

September 2021 - April 2026

- VP Internal** and previously Logistics Director for **UWaterloo Product Management Club** (May 2023 - August 2024)
- Research Assistant for Dr. Maura Grossman** on the topic of the creation of synthetic hospital medical data. (January 2023 - October 2023)
- Canadian Celebration of Women in Computing Conference 2024 Representative through **UWaterloo Women in Computer Science Club**
